“A neutral colour scheme was selected for the living and drawing rooms to promote tranquility. Incorporating concrete textures, red oak accents, and Indian stones in ‘book match patterns’ on the walls adds both warmth and depth to the space.”

— Bharti Sikri and Chander Kaushik, *Founders and Principal Architects, LAD Studio*

The dining area next to the living space boasts a decorative ceiling with geometric patterns in red oak and paint, softened by elegant sepia-toned artworks that also balance the stone on the walls.

“The bedroom’s ambience is enhanced through the use of textured and sparkling grey stone on the walls. These design elements combine seamlessly to create a visually appealing and a functional space.”

— Bharti Sikri and Chander Kaushik, *Founders and Principal Architects, LAD Studio*

Crafted by Bharti Sikri and Chander Kaushik of LAD Studio, this 3,230sqft apartment in Gurugram exudes a sense of continuity and luxuriousness. Initially, the apartment lacked functionality and organisation, prompting the architects to reorganise the space into a smaller and larger unit connected by a central hall. The result is a welcoming foyer area, a minimalist living space, a serene bedroom, a formal drawing area, and a decorative dining space, all designed with natural light, textures, colours, and materials.

The living area features bold furniture, neutral and fresh colours, and concrete textures that create a minimalist yet inviting atmosphere. The couple's bedroom features calming shades of grey and plush blue velvet bed back, a veneered ceiling, and chevron wooden flooring. The formal drawing area showcases custom-made furniture upholstered in various fabrics, and the dining space boasts an intricately patterned decorative ceiling.

According to the designers, using natural light and artwork creates a sense of positivity and serenity, fulfilling the client's brief for a space that can host large family gatherings. **H&DT**
